Web Developer who enjoys the process of conceptualizing systems and design, and creating solutions to complex problems. My love for board game design has instilled in me the ability to break down a problem and see where the points of leverage exists. I value team collaboration and through my ability to see the big picture, I am often asked to take the lead when dealing with small tasks.

SKILLS

Front-end Tools: Sass, Materialize, HTML5 , CSS
Programming Languages: JavaScript, Ruby
Software: Atom, Mongo, Postman
Frameworks: React.js, Node.js, Express.js, JQuery, Ruby on Rails
