Profile

Highly motivated **Web Developer** who enjoys the process of conceptualizing systems and design, and creating solutions to complex problems. A love for board game design has instilled in me the ability to break down a problem and see where the points of leverage exists. I value team collaboration and through my ability to see the big picture, I am often asked to take the lead when dealing with small tasks.

EDUCATION

General Assembly, 2018-2019

Front End Web Development
Software Engineering Immersive

EDX, 2017

Front End Web Development

School of the Art Institute of Chicago

Bachelors of Fine Arts

SKILLS

Frameworks: React.js, Express.js, JQuery, Ruby on Rails
Front-end Tools: Sass, Materialize, HTML5, CSS3
Software: Atom, Mongo, Postman, Visual Studio Code
Databases: MongoDB, PostgreSQL, MySQL
Testing: Jest, @testing-library/react

EXPERIENCE

Full-Stack Developer

Hoops By Holly | Remote   Oct 2019 - Jan 2020

- Pushed reliable front-end and back-end commits as a self-directed freelance contributor.
- Implemented reusable components in **React** and applied responsive Sass to upcoming Homepage.
- Built out back-end RESTful API using Express and MySQL database.

UI Engineer

Groove360 inc. | Remote   Sep 2019 - present

- Participated in planning the front-end Architecture for Beta app.
- Designed landing page and User dashboard and implemented in **React**.

Software Engineering Immersive

General Assembly | Remote   Feb 2019 - Aug 2019

- **CGM-Tracker -** Investigated the data generated by a Dexcom CGM by accessing the API to build a Personal CGM Tracker via web application with Node.js and Express.js and MongoDB. OAuth.2 authentication was needed to access the personal data.
- **BGG Lister -** Created web application for customized user generated lists from boardgamegeek API. Achieved with **React**, Ruby on Rails, PostgreSQL, Sass, and JWT authentication.
- **Touring-Interurban -** Developed web application for tracking the length of your bicycle rides. Created using Node.js, Express.js and MongoDB, EJS and Sass.
